

FCC Localism Campaign,

It has come to my attention that Low Power FM (LPFM) may take priority over existing FM translator services. I listen to K-LOVE on several FM stations as I travel across California (88.3, 91.9, 99.1, 99.5, etc.) and the country and would be very disappointed if this station was no longer available.

I believe K-LOVE provides true family-safe broadcasting. Not only is the station entertaining, but they have ministries that support the hurting and needy across this country and around the world. No other station within my tuning area offers what K-LOVE provides.

Other Christian stations, due to the sale of commercial "spots" from vendors with lower ethical standards of advertising, do not deliver the level of integrity I choose for my family. Without K-LOVE I would probably eliminate radio from my family's environment and resort to CD-only entertainment.

Please protect the FM frequencies that provide K-LOVE to my community and across the country.

Kind regards,
Libby Taylor
